- › Comprehensive range of slings to meet your individual requirements
- › Color: available in blue, red, orange, yellow or green (please specify when ordering)

### A multi-talent for careful transport of patients

The Original LEXA Pro patient lift is an absolute multi-talent among lifts. The PRO series offers motorized patient positioner and motorized leg spreading and is available with either a wide variety of lifting slings.

For instance, it can easily take up patients sitting, lying, or from the floor and move them easily and safely to a sitting or lying position so they can be transported gently and comfortably to the toilet, to the wheelchair, or to the bed. The sway-free transport also conveys a feeling of security.

### Unique Safety Features make the LEXA Pro Patient Lift stand apart from other.

If the belt snaps, the lift's safeties would kick in to avoid a free fall. Safeties are braking systems in the lifting arm that grab onto the rails running up and down the lift mast.
