We all want to be able to move about safely, in comfort and with dignity, and the Barrier Free Lifts PC-2 has proven itself to be an invaluable aid to thousands of people with restricted mobility. Capable of being installed in virtually unlimited configurations, from simple track systems to room covering transversals, our technical engineers will be happy to design track layouts to meet your individual requirements. In whatever location, whether at home, in the workplace, near the swimming pool, or almost anywhere you desire, PC-2 can meet your needs!

The PC-2 can easily be taken off one track, carried to another, and reattached, thus avoiding the need to purchase more than one lift for several different locations. Furthermore, installing small pieces of track where you actually need it saves on more costly continuous track systems. Available with the most comprehensive product line of slings and models with lifting capacities of up to 600 lbs, the Barrier Free Lifts PC-2 just may be the lift solution that you have been looking for.

So reliable and easy to use!
